

How to Xiaomi Wipe Security by TWRP ?

Device Should be at TWRP Mode and usb cable connected, From top right of the Qualcomm Module chose connection as ADB Mode, Tick Security Partitions, at Method box you will see wipe security by twrp

The screenshot displays the Hydra Qualcomm Tool interface. At the top, the title bar reads "Hydra Qualcomm Tool Ver 1.0.1 Build 40 - Windows 10 (Version 10.0, Build 17134, 64-bit Edition)". The main window features a configuration area with the following settings: Brand: AUTO, Model: AUTO, Connection: ADB Mode (highlighted with a red box), and Fastboot To EDL. Below this, a terminal window shows system information and Dongle Info: "***** Dongle Info *****", "Version : Hydra Tool v 1.1", "Serial : 190300000374", "Initialize : OKAY", "Status : Activated", and "Life : 0-[4-0-0-0-0]". The central panel is divided into "Service" and "Extra" tabs, with "Service" selected. Under "Operations", the "Security Partitions" option is checked and highlighted with a red box. Below the operations, the "Method/Option" dropdown is set to "Wipe Security by TWRP" (highlighted with a red box). At the bottom of this section, there is a checkbox for "Auto Restart Device" and an "Execute" button. The bottom status bar shows a progress indicator at 0%, a device ID of 190300000374, and a timestamp of 16.11.2019 12:30:52.
